

TESTING PHASE IN BELGIUM

From May to June, we had the opportunity to test our platform! We organised different sessions and gave the opportunity to our participants to do it the way suited them the best. Some sessions were planned at a certain time in Brussels, others were organised as permanency, some participants did it directly with one of the members or partners of the organisation, others did it at home and received a google form to fill in the evaluation. The sessions were also introduced by a longer or shorter explanation of the project, and more specifically, about the 19 transversal competences.

- ✓ More than 60 persons tested the modules
- ✓ Tested on computer, tablet and phones
- ✓ Tested in 5 languages
French, Dutch, English, Spanish and Arabic
- ✓ Written feedback from 40 participants
- ✓ Participant's background :
 - refugees
 - asylum seekers
 - undocumented migrants
 - documented migrants
 - belgian job seekers
- ✓ • from 18 to 64 years old
- ✓ • from Latin America, Africa, Asia and Eastern Europe
- ✓ • job seekers
- workers
- students
- professional integration experts (who are migrants themselves)

Because of the diversity of the participants, we got lots of different comments and points of view that allowed us to adapt our modules to the different needs of our target group. It also helped us to develop a precise e-tutor guide, taking in account the learning difficulties of some subgroups of our target. Afterwards, we could share everything with our partners to improve all the modules with this enrichful learnings!
